

Card Safe™

The better memory card protector

Card Safe™ Slim

The Card Safe™ Slim proves that bigger-sized memory cards can be stored discreetly and safely at the same time – and kept in a shirt pocket or even a small lady's handbag. Because the Slim is indeed the slimmest of all Card Safes™. It has two compartments for memory cards such as Compact Flash, Memory Stick or MMC.

Although its being slim, the Card Safe™ Slim offers the full range of features: like the other safes, it offers protection against humidity, dust and electrostatic effects. Thanks to its transparent windows, it also helps users to organize the memory cards stored inside.

The Card Safe™ Slim is available in onyx.
